DETAILED ACTION

1. This Office Action is in response to the Amendment filed December 5, 2006.

Claims 1-21 are now pending.

Allowable Subject Matter

2. Claims 1-21 are allowed.

3. The following is an examiner's statement of reasons for allowance:

The present claims are allowable over the closest references: Kenji et al. (JP 54-092526).

Summary of claim 1:

A resin composition comprising	
A	an alkali-soluble resin
B	an infrared absorbing agent having a maximum absorption wavelength in the range of <u>760 nm to 1200 nm</u> and
C	a thiol compound
wherein a solubility of the resin composition in an alkaline aqueous solution is changed by <u>exposure with an infrared laser beam</u>	

Kenji et al. disclose a masking material as ink or coating, comprising a SH group-
containing organic sulfur compound with acid stability and heat resistance, an amine

compound, and phenolic and/or rosin type alkali soluble resin, wherein the -SH group-containing organic sulfur compound is listed in Table 1 (page 142). However, Kenji et al. do not teach a resin composition comprising an alkali-soluble resin; an infrared absorbing agent having a maximum absorption wavelength in the range of 760 nm to 1200 nm; and a thiol compound, wherein a solubility of the resin composition in an alkaline aqueous solution is changed by exposure with an infrared laser beam.

In light of the above discussion, it is evident as to why the present claims are patentable over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
